SOLAR BUSINESS CLUB

## 1ST EMPOWERING WOMEN SUMMIT INDIA

*Greater Noida, India - 19 September 2019*

*Venue: Seafoam Room at R&T Conference*

*Time: 16:00 - 17:30*

## *The Goal*

Women are an important part of the society and our ecosystem. Women's empowerment and achieving gender equality is essential for our society to ensure the sustainable development of the country. Women are more vulnerable to environmental degradation and climate change but also have different perspectives, concerns and ideas for change. Until these are taken on board, with women empowered to play a full part in decision-making at all levels, environmental sustainability will remain a distant goal.

**Why should you attend this session:** For the first time the panel discussion will have

- Equal representation from both women and men to promote gender equality.
- The distinguishing factor about the session is that it will not just end with discussing the important aspects of how and why we all need to have women at key managerial positions
- Empowerment through Cooperation

**Who should attend:** Clean tech has capabilities of exponential growth and India has all the resources to be at par with global companies, and this session would be valuable for all the companies who wish to improve their management, excel in Human resource, create gender parity and increase their revenues, CSR initiative and others

## *Panelists*

**Chair:** Rashi Gupta, Managing Director at Vision Mechatronics, SBC Vice Chair India & Co-Chair of Storage, Mini-grid, Smart Energy, Digitalization & Artificial Intelligence Task Force

**Co-Chair:** Sonia Parashar, Managing Director at The Indo-German Chamber of Commerce
